

# KEY POINTS FOR BERRY GROWERS

**V**ITEC COMBO A FISH & KELP FERTILISER contains the broadest possible range of trace elements, minerals, amino acids and vitamins and is a totally *NATURAL PRODUCT* that can be used beneficially with all fertiliser programs.

BERRY GROWERS using VITEC COMBO, or FISH plus KELP LIQUID FERTILISER and VITEC FISH FERTILISER have reported the following:

- **Less fungal disease**
- **Insects easier to control**
- **Better quality fruit – keeps longer, better colour, improved taste and firmer fruit**
- **Other fertilizers can be moderated**
- **Helps plants at times of stress**
- **Plenty of flowers and better fruit set**
- **Longer harvest – greater productivity**
- **Better establishment for young plants when water with VITEC COMBO**

## HOW CAN VITEC COMBO BE APPLIED?

- As a foliar spray – 2-5 litres per hectare
- Through the drip system – spread over season (often) to total of 20 litres per hectare
- By spraying on the soil (can also be applied with weedicides) – 2-5 litres per hectare

## HOW OFTEN AND IN WHAT QUANTITIES CAN VITEC COMBO BE APPLIED?

- 1 Litre in 100 - 200 litres of water
- 2-5 litres per hectare in 600-2000 litres of water applied as a fine spray every 2-4 weeks
- Can also be sprayed proportionally in reduced amounts more often, e.g. weekly

## Other VITEC products available that will assist berry growers:

VITEC FISH FERTILISER is used in the same way as VITEC COMBO at approximately twice the concentration as VITEC COMBO. VITEC FISH FERTILISER is ideal for soil rejuvenation.

VITEC KING KELP. Is ideal for soaking plants prior to planting. It can also be used for watering plants in after planting. Vitec Kelp is often used in combination with Vitec fish fertiliser e.g. 3 Litres Vitec Fish Fertiliser and 2 Litres of Vitec Kelp sprayed fortnightly.
