

The Use of Vitec Fertiliser for Herb Growers

SOIL APPLICATION

Pre-planting

10 litres **Vitec Fish Fertiliser** in 200 litres water per hectare

- Stimulates soil microbes and earthworms

FOLIAR APPLICATION

1 litre **Vitec Combo** in 200 litres water per hectare and spray every 10 -14 days during active growth.

SEEDLINGS

- Germination accelerated
- Reduces transplant shock of seedlings
- Promotes deep green foliage
- Increases frost resistance

COMPOST TEAS

Vitec Combo, a combination of fish and kelp, is a valuable microbe food in compost teas.

- Apply compost teas in the cool part of the day.
- Apply with a nozzle that is 'microbe friendly' such as the Vitec brass nozzle
