

VITEC Diatomaceous Earth

Natural Worm Control

NATURAL WORM CONTROL

- ◆ 100% Organic
- ◆ Non-Toxic
- ◆ No Withholding Period
- ◆ Suitable for *all Stock*, all Ages
- ◆ Part of Daily Feed Ration, no Drenching
- ◆ May only need an annual chemical drench
- ◆ DOES NOT contain harmful dusts found in swimming pool grade DE

The first time Bev Hicks of Denman, NSW used DE granules in a feed mix, the results were "magnificent". With 600 angora goats, she only used a chemical drench on 3 animals. Now her 200 head of cattle and 200 sheep are receiving the same natural worming treatment greatly reducing the cost of chemical wormers.

Chemical Drenches Wormed Out

The Modra's of SA. have not had to worm or drench calves for 5 years.

DE fine grade dust is given in the calves milk at the rate of 1 TAB/ calf/day from 1 week old until weaned. When the calves are weaned they have access to Pat Coleby loose mineral licks adlib. DE granules are then mixed with seaweed meal (75% seaweed meal and 25% DE granules).

Prevents and controls many internal and external parasites PLUS

- ◆ Cattle Better feed conversion
- ◆ Horses Healthier appearance of stock
- ◆ Pigs Reduction in manure odour
- ◆ Chooks Control red mite with ONE application
- ◆ Cat and dogs Rub into coat for flea control
- ◆ Horse, cattle, sheep Lice control
- ◆ Grain dust or spray silos, machinery for pests

Rates and Other Uses

Weevils NO MORE!

Since using the DE Fine Grade 2 years ago on stored grain the Modra's have had no weevils in the grain. Simple protection is given to barley, oats and lupins by spraying the grain as it enters the silo.

K & E Modra Bordertown S.A.

What is D.E., Diatomaceous Earth ?

Diatomaceous earth is the fossilized shells of microscopic water-dwelling organisms known as diatoms. Ancient dried lake bottoms near Gatton in Queensland formed beds of diatomite or diatomaceous earth, which is mined today providing an organic natural &

DE

CAN BE COMBINED WITH SEAWEED MEAL OR SALT (50 -75% SEAWEED/SALT) & OFFERED AD LIB TO STOCK

DE GRANULE RATES

1 flat tablespoon = approx 6 gms DE granules

BEEF CATTLE	1% of total weight of dry ration, 5% in grain
DAIRY CATTLE	1% of total weight of dry ration
CALVES	60g per day in feed or 1 tab DE DUST in milk in morning until weaned
CHICKENS	5% in feed; use DE DUST in nesting boxes, roosts
PIGS	2% of total feed ration, DE DUST or spray on bedding & animals
HORSES	1 cup in daily feed ration
SHEEP	1% in ground grains, or mixed as 1 part DE to 2 parts mineral salt if salt is free choiced
GOATS	1% in grain, or mixed up to 50% with mineral salt if salt is free choiced

VERY USEFUL & EFFECTIVE Factory Spill Kit

We at Vitec use the granules for mopping up cod liver oil and other spills, then sweep it up DRY with no greasy feel left. The DE is reused for next spill. DE can absorb up to 200 times its weight.

Available in granules or dust,
1—500Kg
